1 What is Clear Build USA?

Clear Build USA is a **cloud-based business management platform built exclusively for US construction contractors**. It puts everything you need to run your contracting business in one place:

- **Leads & Contacts** - track every potential customer and manage your pipeline
- **Quotes** - create professional estimates and get customer approval online
- **Projects** - manage every active job with budgets, tasks, and team assignments
- **Invoices** - send invoices and let customers pay online by card or bank transfer
- **Payments** - full payment history with reversal support
- **Change Orders** - document and get approval for any scope change
- **Scheduling** - manage your availability and let customers book meetings
- **Communications** - all customer messages in one inbox
- **Team Management** - invite your crew and assign roles
- **AI Assistant** - ask business questions, get instant answers

THE BIG PICTURE

Clear Build USA replaces scattered spreadsheets, paper invoices, and multiple disconnected apps with one professional platform that makes your business look and run better.

Benefits at a Glance

Benefit	How Clear Build Delivers It
Get paid faster	Customers pay invoices online by card - no more waiting for checks
Look more professional	Branded quotes and invoices with your logo, delivered digitally
Save hours of admin time	Auto-numbered documents, email templates, one-click quote-to-invoice
Win more jobs	Lead pipeline with heat scores so you never miss a follow-up
Protect yourself legally	Digital change orders with customer approval create a written paper trail
Coordinate your team	Project tasks, crew assignments, and role-based access - all in one place

2 Setting Up Your Account

Step 1: Register

- 1 Go to clearbuildusa.com and click "Get Started Free"**

You'll land on the registration page. Enter your first name, last name, email address, and choose a password (minimum 8 characters).
- 2 Check your email and click the verification link**

We'll send a verification email to the address you registered with. Click the link inside to verify your account. **You cannot log in until your email is verified.** Check your spam folder if it doesn't arrive within 2 minutes.
- 3 Log in with your email and password**

Go to </login> and enter your credentials. The app will remember you for 15 days before asking you to log in again.
- 4 Set up your business**

On first login, you'll be taken to Business Setup. Enter your business name and type (General Contractor, Plumber, Electrician, etc.). This creates your workspace - all your data is attached to this business.
- 5 You're in - start with Settings**

Before creating your first quote, go to **Settings** → **Business Profile** and upload your logo and add your business address. This information appears on all your quotes and invoices.

Free Trial

You get a **15-day free trial** with full access to every feature. No credit card required. After 15 days, upgrade to the Monthly (\$49/month) or Yearly (\$490/year) plan to continue. Your data is never deleted - if you upgrade later, everything is still there.

Forgot Your Password?

1. Go to the login page and click "**Forgot Password?**"
2. Enter your email address and click "Send Reset Link"
3. Check your inbox for a reset link (valid for 1 hour)
4. Click the link and enter your new password

3 Understanding the Layout

The Sidebar (Left Navigation)

Sidebar Section	What it Contains
 Dashboard	Your business overview - stats, charts, recent activity
 Contacts	All your contacts (leads + customers + direct contacts)
↳ Leads	Potential customers you're working to convert (sub-menu)
↳ Customers	Won customers with past invoices (sub-menu)
 Quotes	All quotes you've created
 Invoices	All invoices you've sent
 Projects	All active and completed jobs
 Payments	Payment history across all invoices
 Change Orders	Scope change requests linked to projects
 Scheduling	Availability slots, booking links, meetings
 Communications	Message history with all contacts
 Notifications	Alerts and reminders
 Team	Manage your crew and office staff
 Settings	Business settings, billing, integrations

The Top Bar

- **Business name / switcher** - click to switch between businesses (if you have more than one)
- **Breadcrumb** - shows where you are in the app (e.g. Projects / Kitchen Remodel)
- **Search** () - search contacts, quotes, invoices, and projects across your whole account
- **Bell** () - your notification count; click to see recent alerts
- **New button** - quick-create shortcut for the current section
- **Avatar** - click for Profile, Settings, and Logout

PRO TIP - USE GLOBAL SEARCH

Click the search icon (or press the search bar) to instantly find any contact, quote, invoice, or project by name, number, or keyword. No need to navigate to each section.

4 Dashboard

The Dashboard is the first screen you see after logging in. It gives you an instant health check of your business.

What Each Stat Card Shows

Card	What it shows
Outstanding Invoices	Total dollar amount on invoices that haven't been fully paid yet
Quotes Pending	Number of quotes in "Sent" status waiting for customer approval
Active Projects	Number of projects currently in "In Progress" status
Received This Month	Total payments recorded in the current calendar month

Quick Actions

The four Quick Action buttons at the bottom of the dashboard create a new Contact, Quote, Invoice, or take you to Payments in one click - so you can jump straight to the most common tasks.

Revenue Chart

The bar chart shows 6 months of payment history so you can see trends in your revenue. Hover over any bar to see the exact amount for that month.

5 Contacts, Leads & Customers

Everyone you do business with lives in Contacts. The app automatically organises them into three categories:

Type	Who it is	Where they appear
Lead	A potential customer you're trying to win	Contacts list + dedicated Leads section
Customer	A won client who has invoices with you	Contacts list + dedicated Customers section
Direct Contact	Someone you work with but don't invoice (supplier, partner)	Contacts list only

Adding a Contact

- 1 Go to Contacts in the sidebar and click "New Contact" (top right)**
Or click the quick-action button on the Dashboard.
- 2 Fill in the contact's details**
Name and contact type are required. Email and phone are optional but recommended so you can send quotes and invoices directly from the app.
- 3 Choose the contact type and lead status**
If they're a new potential customer, choose "Lead" and set status to "New Lead". You can always update this as they progress through your pipeline.

The Leads Section

The dedicated Leads page is your sales pipeline view. It shows lead heat scores to help you prioritise your follow-ups:

Heat Score	Status Stages	Action Needed
 Hot	New Lead, In Conversation	Follow up within 24 hours - highest close probability
 Warm	Meeting Scheduled, Site Visit, Proposal Sent, Negotiation	Keep momentum - don't let them go cold

Cold

Lost, Stalled

Consider a re-engagement attempt or archive them

Lead Status Pipeline

Converting a Lead to a Customer

When you win the job, open the lead's contact page and click "**Convert to Customer**". Their type changes to Customer and they appear in your Customers section. All their history (quotes, communications) stays intact.

Contact Detail Page

Click any contact to open their detail page. Here you'll find:

- **At-a-Glance sidebar** - contact info, type, lifetime value (total invoiced)
- **Activity timeline** - every quote, invoice, communication, and note linked to this contact
- **Quick actions** - create a quote, send a message, schedule a meeting - all from the contact page

Customers Section

The Customers page shows all your won clients in a card grid. Each card shows the customer's name, number of invoices, and lifetime value. Toggle between grid and list view using the icons in the top right.

6 Quotes

Quotes are professional job estimates you send to customers for approval. When a customer approves a quote, you can convert it to an invoice with one click.

Quote Status Flow

Creating a Quote

- 1 Go to Quotes → New Quote**
The app auto-assigns the next quote number (e.g. Q-0001). You can customise the prefix in Settings → Tax & Numbering.
- 2 Fill in the 3-column header**
Customer - search and select from your contacts. **Job Site** - the address where the work will be done. **Valid Through** - the quote expiry date (defaults to 30 days from today).
- 3 Add your line items**
For each item/service: enter a description, quantity, unit price, discount (optional), and tax rate (optional). The total calculates automatically.
- 4 Choose how to send it**
Use the Send Channel toggles to select Email, SMS, or WhatsApp. Click "Send Quote" - the customer receives a link to view the professional quote preview.

How the Customer Sees the Quote

When you send a quote, the customer receives a link to a professional preview page (no login required). On that page they can:

- **Approve** - marks the quote as Approved. You're notified and can convert it to an invoice.
- **Request Changes** - customer can leave a note. You'll see it in the quote's activity feed.

PRO TIP - CONVERT TO INVOICE

Once a quote is Approved, open it and click "Convert to Invoice." All line items are copied over - no double entry. The linked quote and invoice are automatically cross-referenced.

Quote Activity Sidebar

On the Quote detail page, the right sidebar shows the full activity history - when it was created, sent, viewed, and approved (or rejected). Use this to see exactly what happened and when.

Quote List View

The Quotes list shows 5 stat cards at the top (Total, Draft, Sent, Approved, Rejected) so you can see your pipeline at a glance. Filter by status using the tabs below the stat cards.

7 Invoices

Invoices are payment requests sent to customers. Customers can pay online by card or bank transfer, or you can record a manual payment (check, cash) when you receive it.

Invoice Status Flow

Creating an Invoice

- 1 Go to Invoices → New Invoice (or convert from an approved quote)**
Converting from a quote copies all line items automatically. Creating manually: the app auto-assigns the next invoice number (e.g. INV-0001).
- 2 Select the customer and link to a project (optional)**
If you don't link to an existing project, the app automatically creates one for you and links the invoice to it.
- 3 Add line items**
Same as a quote - description, quantity, unit price, discount, and tax. Totals calculate automatically.
- 4 Set payment options (right sidebar)**
Choose the due date, payment method, and whether to schedule automatic reminders (e.g. "Send reminder 3 days before due via email").
- 5 Add internal notes (optional)**
Notes are only visible to your team, never to the customer. Use this for internal job notes or payment terms reminders.
- 6 Send the invoice**
Click "Send Invoice." The customer receives a link to view the invoice and pay online.

How the Customer Pays Online

The customer clicks the link in their email. They see a professional invoice page with your branding. At the bottom is a large **"Pay \$X"** button. Clicking it takes them to a secure Stripe payment page where they can pay by:

- Credit or debit card (Visa, Mastercard, Amex, Discover)
- ACH bank transfer (US bank accounts)

When payment is complete, Stripe notifies Clear Build USA automatically. The invoice status updates to **Paid** and you receive an in-app notification.

Recording a Manual Payment

If the customer pays by check or cash, record it manually:

1. Open the invoice
2. Click **"Record Payment"** in the Payment Summary sidebar
3. Choose the amount tab: Full / 50% / Deposit / Custom
4. Select the payment method: Card, Bank Transfer, Check, or Cash
5. Click "Record Payment" to save

PARTIAL PAYMENTS

If a customer pays a deposit (e.g. 50% upfront), record the first payment. The invoice status changes to "Partial." Record the remaining payment when you receive it - the invoice moves to "Paid" when the balance reaches \$0.

Invoice Detail Page

The Invoice detail page shows:

- **Left panel:** Invoice header, line items, totals, notes, activity timeline
- **Right sidebar:** Payment summary with progress bar (amount paid vs. total), and "Record Payment" / "Manage Billing" buttons

8 Projects

Projects are the jobs you're actively working on. Each project tracks budget, timeline, team, tasks, and linked financial documents (quotes, invoices, change orders).

Project Statuses

Planning → In Progress → On Hold → Completed or Cancelled

Creating a Project

1 Go to Projects → New Project

Auto-assigned project number (e.g. PRJ-0001). Customise the prefix in Settings → Tax & Numbering.

2 Fill in project details

Project name, select the customer, start date, end date, and budget amount. The app automatically calculates "Day X of Y" from your dates.

3 Set budget and deposit

Enter the total project budget. Set a deposit percentage if you require an upfront payment (e.g. 30%). This helps track whether a deposit has been received.

4 Assign team members

Use the Team panel to assign specific crew members from your team to this project. They'll see the project in their view.

5 Set client visibility

Toggle "Visible to client" if you want the customer to be able to see project progress. When enabled, the customer can view tasks and updates (future feature).

Managing Tasks

Inside a project, the Tasks tab lets you break the job down into individual steps:

- Click **"Add Task"** and enter a task name and due date
- Assign the task to a specific team member
- Mark tasks complete as work progresses - the project progress bar updates automatically
- Tasks are visible to the whole team (based on their role)

Project List View

The Projects list shows colour-coded cards for each project. Each card shows:

- Project name and customer
- Progress bar (% of tasks complete)
- "Day X of Y" timeline indicator
- Status badge (In Progress, Planning, etc.)
- Budget amount

Logging Project Updates

Use **Project Updates** (sidebar → Project Updates) to log daily progress notes. These serve as a running diary of the job - useful for client reporting and dispute resolution if needed.

Item Requirements

The **Item Requirements** section (sidebar) lets you create material lists linked to projects. Track what materials are needed, quantities, estimated costs, and procurement status. This helps with job costing and ordering.

9 Payments

The Payments section is your complete financial record of all money received across all invoices.

What You'll See on the Payments Page

- **4 method stat cards** - total received by Card, Bank Transfer, Check, and Cash
- **Mini bar chart** - payments over the last 6 months at a glance
- **Payment list** - every payment with date, amount, invoice, and method

Payment Methods

Method	How it's recorded
 Card	Automatically when customer pays online via Stripe, or manually if you ran their card
 Bank Transfer	Automatically via Stripe ACH, or manually when you receive a bank transfer
 Check	Always manual - record when you receive and deposit the check
 Cash	Always manual - record when customer hands over cash

Reversing a Payment

If you recorded a payment by mistake (e.g. wrong amount, bounced check), you can reverse it:

1. Find the payment in the Payments list
2. Click the three-dot menu (...) on the right
3. Select "Reverse Payment"
4. Confirm - the payment is removed and the invoice's outstanding balance is restored

REVERSAL IS OWNER/ADMIN ONLY

Only users with the Owner or Admin role can reverse payments. Staff and Crew members will not see the Reverse option.

10 Change Orders

A Change Order is an official document for any work that was added or changed after the original quote was agreed. Instead of verbal agreements that lead to disputes, Change Orders give you a written, customer-approved paper trail.

Change Order Status Flow

Creating a Change Order

- 1 Go to Change Orders → New Change Order**
Link it to the relevant project. Add a description explaining why the scope is changing.
- 2 Add line items for the new/changed work**
Include description, quantity, and unit price for each item being added. The total calculates automatically.
- 3 Send to the customer**
Click "Send Change Order." The customer receives a link to review and approve (or reject) the change.
- 4 Wait for approval - then proceed with the work**
Never start additional work until the change order is Approved. The approval is your written authorisation.

BEST PRACTICE

Get every scope change - even small ones - documented as a change order. "It'll only take an hour" disputes cost contractors thousands. A 2-minute change order prevents them.

11 Scheduling & Booking Links

The Scheduling section lets you manage your availability, create shareable booking links for customers, and track all your meetings in one place.

The 4 Scheduling Tabs

Tab	What it does
Slots	Create individual availability time blocks with date, time, meeting type, and location
Booking Links	Generate shareable links that customers can open to pick a slot
Meetings	View and manage all confirmed meetings, update their status
Settings	Default meeting type and timezone preferences

How to Set Up a Customer Booking

- 1 Create availability slots (Slots tab → "Add Slot")**
Choose date, start/end time, meeting type (Consultation, Site Visit, Estimate Meeting, etc.) and location. You can create recurring slots (daily/weekly/monthly).
- 2 Create a booking link (Booking Links tab → "New Link")**
Select which slots to include, add a message for the customer, set an expiry date, and optionally link to a specific contact. Click "Create Link."
- 3 Copy and share the link**
Click the copy icon next to the booking link. Send it to your customer by text, email, or WhatsApp.
- 4 Customer selects a slot and confirms**
On the public booking page (no login required), the customer sees your available slots, picks one, and submits. The meeting appears in your Meetings tab with status "Scheduled."

Meeting Statuses

Status	Meaning
Scheduled	Booking confirmed, meeting is upcoming

Confirmed	You've personally confirmed the appointment
Completed	Meeting took place as planned
Canceled	Meeting was cancelled by either party
No Show	Customer didn't show up
Rescheduled	Meeting time was changed

12 Communications

The Communications section is your unified message inbox - every email, SMS, WhatsApp, phone note, and log entry for every contact, all in one place.

Layout

- **Left panel:** contact list, search bar, channel filter tabs (All, Email, SMS, WhatsApp, Note)
- **Right panel:** the conversation thread for the selected contact

Sending a Message

1. Click on a contact in the left panel
2. In the message input at the bottom, choose the channel (Email, SMS, WhatsApp)
3. Type your message and click Send

Logging a Communication

If you had a phone call or in-person meeting, log it manually:

1. Click "Log Communication" in the top right of the chat view
2. Choose the channel (Call, Note, etc.), enter a subject if needed, and write the summary
3. Save - it appears in the contact's conversation history with a timestamp

WHY LOG CALLS AND MEETINGS?

A complete communication history protects you if a dispute arises ("You said you'd do X on that call"). Every logged interaction is date-stamped and searchable.

Invite your crew, office staff, and project managers to Clear Build USA. Each person gets their own login with access based on their role.

Team Roles

Role	What they can do
Owner	Full access to everything - including billing, settings, and reversing payments
Admin	Everything except billing and subscription management
Staff	View and edit contacts, quotes, invoices, projects. Cannot record payments or send notifications.
Crew	View assigned projects and tasks. Cannot access financial data.

Inviting a Team Member

1 Go to Team in the sidebar → Click "Invite Member"

2 Enter their email address and choose a role

The invite email contains a link that expires in 7 days.

3 They accept the invite

If they already have a Clear Build USA account, they log in and the business appears in their switcher. If not, they'll register first, then the business is added.

Removing a Team Member

Find the member in the Team list, click the three-dot menu (⋮), and select "Remove from Team." Their access is revoked **immediately** - the next time they try to use the app, they are logged out automatically. Their past activity (quotes they created, etc.) is preserved.

IMMEDIATE REVOCATION

Access is revoked instantly when you remove someone - even if they are currently logged in. This is designed to protect your business data if a relationship ends unexpectedly.

14 Templates & Notifications

Templates

Templates are reusable message bodies for common communications - quote-sent messages, invoice reminders, payment confirmations, etc.

- Go to **Templates** in the sidebar to see your library
- Click "New Template" to create one - give it a name, choose a type, write the subject and body
- Use variables like **{{contact_name}}** and **{{business_name}}** - these are filled in automatically when you send
- Duplicate any template to create a variation quickly

Default templates are pre-loaded: *Quote Sent*, *Invoice Due Reminder*, *Payment Received*. Customise them with your own wording in **Settings** → **Email Templates**.

Notifications

The Notifications section (bell icon) shows in-app alerts for events like quote approvals, invoice payments, and team invites. Two tabs:

- **Activity** - your notification feed. Click "Mark all read" to clear the count.
- **Templates** - manage notification message templates

To send a manual notification to a customer (e.g. a reminder email or WhatsApp message), go to Notifications, click "Send Notification," choose a template and the contact, and send. *Owner or Admin role required.*

15 AI Chatbot Assistant

Clear Build USA includes a built-in AI business assistant powered by Google Gemini. Access it by clicking the chat icon in the bottom-right corner of any screen.

What Can the AI Assistant Help With?

- Questions about how to use any feature in the app
- General contractor business advice (how to price a job, how to write a professional quote, how to handle a payment dispute)
- Help drafting messages to customers
- Business management questions

WHAT THE AI CANNOT DO

The AI assistant cannot read your specific business data (your contacts, invoices, projects) - it provides general guidance only. For specific data, use the app's built-in reports and dashboards.

Example Questions to Ask

- "How do I convert a quote to an invoice?"
- "What should I include in a professional change order?"
- "How do I set up a booking link for customer consultations?"
- "What's a fair deposit percentage for a kitchen remodel?"
- "Help me write a professional payment reminder email."

Settings is where you configure your business profile, preferences, and integrations. Go to **Settings** in the sidebar. The left navigation has 9 sections:

Section	What to configure here
 Business Profile	Business name, type (General Contractor, Electrician, etc.), address, phone number, and logo. Do this first - your logo and business name appear on all quotes and invoices.
 Preferences	Default currency (USD), date format (MM/DD/YYYY or DD/MM/YYYY), and fiscal year start month.
 Tax & Numbering	Default tax rate applied to new quotes and invoices. Document number prefixes: Quote (Q-), Invoice (INV-), Project (PRJ-). You can change these to match your existing numbering system.
 Notification Preferences	Toggle which events trigger email or in-app notifications (quote approved, invoice paid, team invite accepted, etc.).
 Email Templates	Customise the subject and body of outgoing emails for: Quote Sent, Invoice Due Reminder, Payment Received. Supports {{contact_name}}, {{business_name}} variables.
 Integrations	View Stripe connection status. Set up outbound webhooks for 8 event types (invoice.paid, quote.approved, etc.).
 Region & Language	Set your timezone (important for scheduling) and language preference.
 Security	Change your password. Enter current password, then new password (min 8 characters).
 API & Webhooks	Configure a webhook endpoint URL. Clear Build will POST to this URL whenever a supported event occurs in your account.

FIRST-TIME SETUP CHECKLIST

1. Upload your logo (Business Profile)
2. Add your business address and phone (Business Profile)
3. Set your default tax rate (Tax & Numbering)

4. Set your timezone (Region & Language)
5. Customise email templates with your business voice (Email Templates)

17 Subscription & Billing

Manage your subscription at **Settings** → **Subscription** (or go directly to /subscription).

Plans

Plan	Cost	What's Included
Free Trial	\$0 for 15 days	All features, unlimited contacts, no credit card required
Monthly Pro	\$49/month	Full access to all features. Cancel any time.
Yearly Pro	\$490/year	Full access + 2 months free (saves \$98 vs monthly). Best value.

Upgrading Your Plan

1. Go to /subscription
2. Click "Start Monthly Plan" or "Start Yearly Plan"
3. You'll be taken to a secure Stripe checkout page
4. Enter your payment details and confirm
5. Your subscription activates immediately

Managing Your Billing

Click "**Manage Billing**" on the subscription page to open the Stripe billing portal, where you can:

- Update your credit card
- Download invoices / receipts
- Cancel or change your plan
- View billing history

YOUR DATA IS SAFE

If your subscription expires or you cancel, your data is never deleted. You can re-subscribe at any time and continue right where you left off.

18 Your Profile

Your profile is your personal information within Clear Build USA. Access it by clicking your avatar in the top bar → "Profile."

Profile Page (/profile)

- Your name, bio, and profile photo
- Activity stats (quotes created, invoices sent, etc.)
- Skill tags (e.g. Framing, Electrical Rough-In, Tile Work)
- Recent work grid

Editing Your Profile (/profile/edit)

- Upload a profile photo
- Edit your display name, bio, and contact info
- Change your password (same as Settings → Security)
- Toggle profile visibility (public vs private)

Switching Between Businesses

If you belong to multiple businesses (e.g. you manage two separate LLCs), click your business name in the top bar to open the business switcher. Select the business you want to work in - the app reloads in that context. All data (contacts, projects, invoices) is completely separate between businesses.

19 Frequently Asked Questions

Getting Started

Q Why didn't I receive the verification email?

Check your spam or junk folder first. If it's not there, go to the login page, click "Didn't receive the email?" and request a new one. Make sure you used the correct email address when registering.

Q Can I have more than one business on one account?

Yes. One Clear Build USA account can be a member of multiple businesses. Use the business switcher in the top bar to switch between them. Each business has its own separate data, contacts, invoices, and settings.

Q What happens when my free trial ends?

After 15 days, your account enters "restricted mode." You can still see all your data, but creating new quotes, invoices, and projects will prompt you to upgrade. Your data is never deleted - upgrade at any time to regain full access.

Quotes & Invoices

Q Can I change a quote after I've sent it?

Yes, but be careful - if the customer has already received the link, any changes you make will be reflected in their view the next time they open it. Best practice: if significant changes are needed, void the current quote, create a new revised version, and send the new link.

Q How does online invoice payment work - when do I get the money?

When a customer pays by card, Stripe typically deposits the funds to your bank account within 2 business days. ACH bank transfers take 3–5 business days. You can see your deposit schedule in the Stripe dashboard (linked from Settings → Integrations).

Q Can a customer pay a partial amount on an invoice?

Yes. You can record partial payments manually (50%, deposit %, or any custom amount). For online payments, the full invoice amount is charged - for partial billing, create separate invoices or record the partial payment manually after the fact.

Q The customer approved a quote but I need to change some items before invoicing. What do I do?

Convert the quote to an invoice, then edit the invoice's line items as needed. If the change is significant (scope or price), issue a Change Order for the difference so there's a documented trail of why the amounts differ from the original quote.

Q How do I customise my invoice/quote number format?

Go to Settings → Tax & Numbering. You can change the prefix for quotes (default: Q-), invoices (default: INV-), and projects (default: PRJ-). The number continues sequentially from the last one created. You cannot retroactively renumber past documents.

Projects & Payments

Q I created an invoice without linking a project - where did it go?

Clear Build automatically creates a project for you and links the invoice to it. Check your Projects list - you'll find a new project named after the invoice. You can rename and add details to it.

Q Can I track time worked on a project?

The current version supports task tracking (with due dates and completion status) and project updates (daily notes). Dedicated time/hour tracking per team member is planned for a future release.

Q I recorded a payment for the wrong invoice. How do I fix it?

Reverse the payment on the incorrect invoice (open that invoice → Payments section → Reverse), then record it on the correct invoice. You need Owner or Admin role to reverse payments.

Team & Permissions

Q A team member invited someone but they haven't signed up yet. Can I resend the invite?

Yes. Go to Team, find the pending invite in the list, and click "Resend Invite." The invite link is valid for 7 days from the time it was sent (or re-sent).

Q If I remove a team member, do they lose access right away?

Yes - immediately. Even if they are currently logged in, their next action in the app will log them out. This is by design to protect your business data.

Q Can a Staff member see financial data?

Staff can view and edit quotes, invoices, and projects. They cannot record payments, reverse payments, or send bulk notifications. Crew members have even more limited access - they can only see assigned projects and tasks.

Account & Security

Q How do I change my password?

Go to Settings → Security. Enter your current password and then your new password (minimum 8 characters). Or, if you've forgotten your password, use the "Forgot Password" link on the login page.

Q Is my business data private from other businesses on the platform?

Yes, completely. Every piece of data (contacts, quotes, invoices, projects) is isolated to your business. No other business can see your data, and you cannot see theirs. This isolation is enforced at every level of the system.

Q How long does the system keep me logged in?

Your login session lasts 15 days. After that, you'll be asked to log in again. If you check "Keep me signed in" on the login page (if available), the session extends further.

Billing

Q How do I cancel my subscription?

Go to /subscription → click "Manage Billing." This opens the Stripe billing portal where you can cancel your subscription. Cancellation takes effect at the end of your current billing period - you keep full access until then.

Q Can I get a refund?

Contact support (see Section 20) within 7 days of a charge if you believe there's been an error. We review each case individually. We do not offer prorated refunds for mid-period cancellations.

Q Is there a mobile app?

The web app is fully mobile-responsive and works on any smartphone browser. A dedicated iOS and Android app is on the roadmap for later in 2026. For now, you can add the website to your home screen for a near-app experience.

20 Support & Contact

We're here to help. Clear Build USA offers multiple support channels depending on your question.

In-App AI Assistant

Click the chat icon (bottom-right of any screen) for instant AI-powered answers to how-to questions

Help & FAQs

Go to Help in the sidebar - searchable FAQ for common questions and step-by-step guides

Support Ticket

Go to Help → "Submit a Ticket" for issues that need human review. Track your ticket status in the app.

Support Contact Information

Channel	Contact	Response Time
 Email Support	support@clearbuildusa.com	Within 24 business hours
 In-App Ticket	Help → Submit a Ticket	Within 24 business hours
 Website	clearbuildusa.com	Always available
 AI Chatbot	Chat icon in app (bottom right)	Instant (24/7)

Before You Contact Support - Quick Checklist

1. Search the FAQ in the Help section - most common issues are covered there
2. Try asking the AI chatbot - it can walk you through most features step by step
3. Try logging out and logging back in - this resolves most session-related issues
4. Check that your subscription is active (Settings → Subscription) if features are locked
5. If a quote or invoice isn't displaying correctly, try refreshing the page

When Submitting a Support Ticket, Include

- Your business name and email address
- The name of the feature or page where the issue occurred (e.g. "Invoice INV-0023")
- What you were trying to do and what happened instead
- A screenshot if possible - this speeds up diagnosis significantly

WE WANT YOUR FEEDBACK

Is there a feature you'd love to see? Something confusing? Something you love? Go to **FEEDBACK** in the sidebar and leave a note. We read every single submission. Clear Build USA is built for contractors - your feedback directly shapes what we build next.
