Color & Typography

Responsive Design

01 Tester Onboarding — Read This First

YOUR TOOLS

- This PDF printed or on screen — fill the Result/Status columns with a pen or annotation tool
- Google Chrome (latest) as primary browser
- Firefox, Safari (Mac/iPhone), Edge — for compat checks
- Mobile phone + tablet — for device checks
- Browser DevTools (F12) — resize window for responsive
- Screenshot tool (Windows: Win+Shift+S / Mac: Cmd+Shift+4)
- Folder to save bug screenshots — name them BUG-001.png etc.

TEST ACCOUNT SETUP

- URL: <https://clearbuildusa.com>
- Register a fresh account with a real email address
- Verify your email (check inbox for verification link)
- Complete business setup (business name, phone, address)
- Use this account throughout all tests
- Do NOT use a production business's real data
- For Stripe payment tests — use card: **4242 4242 4242 4242**, any future date, any CVC

HOW TO RECORD RESULTS

- **Actual Result:** Write exactly what you see (even if it passed)
- **Status:** Write PASS / FAIL / SKIP / N/A
- **FAIL** = anything that doesn't match Expected Result
- **SKIP** = test you could not run (note why)
- **N/A** = test not applicable to current config
- If FAIL: fill a Bug Report (Section 23) immediately
- Take a screenshot for every FAIL

DAILY REPORTING

- At end of each testing session, fill the Daily Report (Section 24)
- Share the report + screenshots with the project owner
- Do NOT move to next module until current module is fully recorded
- Test in module order (01 → 22) — some modules depend on data from earlier ones
- Mark ✓ next to test ID when complete
- Ask for clarification if any Expected Result is unclear

Status Definitions

✓ PASS — Result matches expected

✗ FAIL — Result does not match, or error occurred

○ SKIP — Could not test (note reason)

— N/A — Not applicable

Priority Definitions

P1 CRITICAL — App unusable, data loss, security

P2 HIGH — Major feature broken, blocks user

P3 MEDIUM — Feature partially broken, workaround exists

P4 LOW — Minor cosmetic, typo, UI spacing

For each cell: write PASS, FAIL, or SKIP. Test the core user journey in each environment: login → dashboard → create quote → view invoice.

Browser / Version	Windows 11 Desktop	macOS Desktop	iPad Safari	Android Tablet	iPhone Safari	Android Phone	Notes
Chrome (latest)							
Firefox (latest)			—		—		
Safari (latest)	—			—		—	
Edge (latest)							
Chrome Mobile	—	—					

Screen Size / Responsive Breakpoints

Viewport Size	Width	Sidebar visible?	Tables readable?	Modals fit screen?	Forms usable?	Buttons tappable?	Overall Status
Large Desktop	1440px+						
Standard Desktop	1280px						
Small Desktop / Laptop	1024px						
Tablet Landscape	1024px						
Tablet Portrait	768px						
Mobile Large	430px						
Mobile Standard	390px						
Mobile Small	375px						

03 Global UI/UX Checklist — Run Once Across All Pages

Brand Colors — Verify on Every Screen

**Navy**

#16265a — Headings, sidebar, primary text

**Green**

#3FA66B — Primary action buttons, success

**Blue**

#2453E4 — Links, secondary actions

**Background**

#f6f6f3 — Page background

**Border**

#e7e6e1 — Card borders, dividers

Typography

- ☐ Font is Inter (clean sans-serif) on all pages
- ☐ Page titles are large, bold, navy colored
- ☐ Body text is readable (min 14px equivalent)
- ☐ No text overflow or truncation on standard screens
- ☐ Labels above form fields are visible
- ☐ No spelling errors visible on main screens

Spacing & Layout

- ☐ Sidebar is visible and not overlapping content
- ☐ Cards have consistent padding (approx 20-24px)
- ☐ Page header has title + action button aligned
- ☐ Tables have proper column spacing (not cramped)
- ☐ Form rows have consistent spacing between fields
- ☐ Footer / bottom content not cut off

Hover & Focus States

- ☐ Buttons: hover changes background color visibly
- ☐ Sidebar links: hover shows highlight
- ☐ Table rows: hover shows light blue/gray highlight
- ☐ Input fields: focus shows blue border outline
- ☐ Tab key navigates through all form fields in order
- ☐ Links: cursor changes to pointer on hover

Loading & Transitions

- ☐ Loading spinner appears when fetching data
- ☐ Buttons show loading state (disabled, spinner) on submit
- ☐ Page transitions are smooth (not jarring flashes)
- ☐ Modals open with fade animation
- ☐ Toast notifications appear and auto-dismiss
- ☐ No white flash on page load

Empty States

- ☐ New account: each module shows "No X yet" message
- ☐ Empty states have an icon + message + call-to-action button
- ☐ No blank white boxes or missing content placeholders
- ☐ Empty tables don't show broken headers with no rows
- ☐ Dashboard stats show "0" not blank when no data exists

Error States

- ☐ Form validation: red error text appears below each invalid field
- ☐ Required fields clearly marked (asterisk or "Required")
- ☐ API errors show user-friendly toast message (not raw JSON)
- ☐ 404 page shows "Page not found" with a back button
- ☐ Network timeout: app shows error, doesn't freeze

04 Module: Authentication (Register · Login · Forgot Password)

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-001	P1	Register	1. Go to /register 2. Fill all fields with valid data 3. Click "Create Account"	Redirects to "Check your email" page. Verification email arrives in inbox.			
TC-002	P1	Email Verify	1. Click verification link in email	Email verified. Redirected to login page with success message.			
TC-003	P1	Login	1. Go to /login 2. Enter verified email + correct password 3. Click "Sign In"	Redirected to /business-setup (first time) or /dashboard.			
TC-004	P2	Wrong Password	1. Login with wrong password	Error message: "Invalid credentials". No login. Page stays on /login.			
TC-005	P2	Unverified Email	1. Register new account, don't verify 2. Try to login	Error: "Please verify your email before logging in".			
TC-006	P2	Forgot Password	1. Click "Forgot password" on login 2. Enter email, submit 3. Check inbox, click reset link 4. Enter new password, submit	Reset email arrives. New password works on login. Old password no longer works.			
TC-007	P2	Register Validation	1. Submit register form with empty fields 2. Submit with invalid email format 3. Submit with password < 8 chars	Each invalid field shows a specific error message. Form does not submit.			
TC-008	P1	Auth Guard	1. Log out 2. Paste /dashboard URL in browser	Redirected to /login. Cannot access dashboard when unauthenticated.			
TC-009	P2	Logout	1. Click user avatar / menu 2. Click "Sign Out"	Session cleared. Redirected to /login. Back button doesn't restore session.			
TC-010	P3	Login UI	1. Open /login on desktop and mobile	Logo, form, "Forgot password" link all visible. No overflow. Green CTA button.			

05 Module: Business Setup & Onboarding

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-011	P1	Business Setup	1. After first login 2. Fill business name, phone, address 3. Click Save / Continue	Business created. Redirected to /dashboard. Business name shows in sidebar.			
TC-012	P2	Business Setup Validation	1. Submit empty business name	Error: "Business name is required". Form stays open.			

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-013	P3	Logo Upload	1. In Business Setup or Settings 2. Upload a PNG logo file	Logo preview shows. Logo appears in app header/sidebar after save.			

06 Module: Dashboard

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-014	P1	Stats Load	1. Navigate to /dashboard 2. Wait for page to load	4 stat cards visible: Revenue, Quotes, Invoices, Active Projects. Values load (0 if no data).			
TC-015	P2	Revenue Chart	1. View dashboard after creating at least 1 paid invoice	Revenue chart renders with correct months on X-axis. Bars/line visible.			
TC-016	P2	Quick Actions	1. Click each quick action button on dashboard	Each button navigates to correct module: New Quote, New Invoice, New Contact, New Project.			
TC-017	P2	Recent Activity	1. Create a quote 2. Return to dashboard	Recent activity section shows the newly created quote.			
TC-018	P3	Dashboard UI	1. Check cards, chart, sidebar on 1280px screen	No overflow. All elements visible. Navy heading. Green stat card borders or icons.			
TC-019	P2	Notifications Bell	1. Click the notification bell in the header	Dropdown opens with notification list. Unread count badge visible if notifications exist.			

07 Module: Sidebar Navigation & Routing

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-020	P1	All Nav Links	1. Click each sidebar link: Dashboard, Contacts, Leads, Quotes, Invoices, Payments, Projects, Change Orders, Scheduling, Communications, Templates, Reports, Team, Settings	Each link navigates to the correct page without 404 or error.			
TC-021	P2	Active State	1. Navigate to each page via sidebar	Active sidebar link is highlighted (green or bold). Other links not highlighted.			
TC-022	P2	Business Switcher	1. Click the business name dropdown in sidebar	Shows current business name. If multiple businesses, shows list to switch.			
TC-023	P2	Mobile Nav	1. Open app on 390px viewport 2. Look for hamburger/menu icon 3. Tap it	Sidebar drawer opens from left or bottom nav appears. All links accessible.			
TC-024	P3	Hover States	1. Hover over each sidebar item	Hover shows color change (light background or text brightens). Cursor is pointer.			

08 Module: Contacts (All, Customers, Leads)

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-025	P1	Create Contact	1. Contacts → "New Contact" 2. Fill: name, email, phone, address 3. Select type: Customer 4. Click Save	Contact saved. Appears in contacts list. Success toast shown.			
TC-026	P1	Create Lead	1. Contacts → "New Contact" 2. Select type: Lead 3. Set Lead Status to "New Lead" 4. Save	Lead saved. Appears in Leads tab. Lead status "New Lead" visible.			
TC-027	P2	Edit Contact	1. Open a contact 2. Edit the phone number 3. Click Save	Updated phone number saved and shown on contact detail page.			
TC-028	P2	Delete Contact	1. Open a contact 2. Click Delete 3. Confirm in dialog	Contact removed from list. Cannot be found by search.			
TC-029	P2	Search Contacts	1. Type a name in search box on contacts page	List filters in real-time to show only matching contacts.			
TC-030	P2	Lead Status Update	1. Open a lead contact 2. Change lead status to "In Conversation" 3. Save	Status updated. Badge on lead shows "In Conversation".			
TC-031	P3	Contact Tabs	1. Navigate between All / Customers / Leads tabs	Each tab shows only the relevant contact type. Counts shown in tab labels.			
TC-032	P3	Contact Detail	1. Click a contact name to open detail page	Detail page shows all contact info, linked quotes, invoices, projects, notes.			

09 Module: Quotes

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-033	P1	Create Quote	- Quotes → "New Quote" - Select a contact - Add 2 line items (name, qty, rate) - Apply 10% tax - Click Save	Quote created with auto-number Q-0001. Totals calculated correctly. Status: Draft.			
TC-034	P1	Quote Totals	- Add items: \$100 + \$200 - Apply 10% tax	Subtotal: \$300.00. Tax (10%): \$30.00. Total: \$330.00. Numbers update on change.			
TC-035	P2	Add/Remove Items	- Create quote with 3 items - Delete the middle item	Item removed. Total updates instantly. No page reload needed.			
TC-036	P2	Send Quote	- Open a Draft quote - Click "Send" - Confirm	Quote status changes to Sent. Email sent to contact (check inbox).			
TC-037	P2	Quote → Invoice	- Open a Sent quote - Click "Convert to Invoice"	New invoice created with same line items and contact. Invoice status: Draft.			
TC-038	P2	Edit Quote	- Open a Draft quote - Edit item name and rate - Save	Changes saved. Updated totals shown.			
TC-039	P2	Quote Status Flow	Check status badges on quotes list	Badges: Draft (gray), Sent (blue), Accepted (green), Rejected (red). Colors correct.			
TC-040	P3	Quote PDF	- Open a quote - Click "Download PDF" or "Print"	PDF downloads or opens with professional layout — logo, contact info, line items, total.			
TC-041	P2	Auto-numbering	Create 3 quotes back to back	Numbers are sequential: Q-0001, Q-0002, Q-0003. No duplicates.			
TC-042	P3	Quote Notes	- Add a note in the notes field of a quote - Save	Notes saved and visible in quote detail view and on PDF.			

10 Module: Invoices

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-043	P1	Create Invoice	1. Invoices → "New Invoice" 2. Select a contact 3. Add line items, apply tax 4. Set due date 5. Click Save	Invoice created with auto-number INV-0001. Status: Draft. Totals correct.			
TC-044	P2	Send Invoice	1. Open a Draft invoice 2. Click "Send Invoice" 3. Confirm	Status changes to Sent. Email with invoice link sent to contact.			
TC-045	P1	Mark as Paid	1. Open a Sent invoice 2. Click "Mark as Paid" 3. Confirm	Status changes to Paid. Invoice removed from "Outstanding" filter. Revenue stat updates.			
TC-046	P2	Invoice Overdue	1. Create invoice with a past due date	Invoice shows "Overdue" badge. Different color (red/orange) from Sent (blue).			
TC-047	P2	Invoice Filter	1. Apply filters: Draft, Sent, Paid, Overdue	Each filter shows only invoices of that status. Count in filter matches visible rows.			
TC-048	P3	Invoice PDF	1. Download or print invoice PDF	PDF shows logo, company name, contact info, line items, total, due date, invoice number.			
TC-049	P2	Invoice → Project	1. Create invoice without linking a project	System auto-creates a project and links the invoice. Project appears in Projects module.			
TC-050	P2	Stripe Payment Link	1. Open a Sent invoice 2. Click "Pay Online" or check for a payment link	Stripe checkout page opens with correct amount. Test card 4242... completes payment.			

11 Module: Payments

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-051	P1	Payments List	1. Navigate to /payments	Table of payments loads. Columns: invoice, contact, amount, date, status.			
TC-052	P2	Record Manual Payment	1. Payments → "Record Payment" 2. Select invoice, enter amount, date, method (cash/check) 3. Save	Payment recorded. Invoice status updates to Paid (if full amount). Payment appears in list.			
TC-053	P2	Partial Payment	1. Record a payment for 50% of invoice amount	Invoice shows "Partial" status. Balance due shown correctly.			
TC-054	P2	Stripe Online Payment	1. Click pay link from a sent invoice 2. Use Stripe test card 4242 4242 4242, future date, any CVC	Payment processes successfully. Invoice marked as Paid. Stripe dashboard shows the charge.			
TC-055	P3	Payment Totals	1. Check payment page summary stats	Total received, outstanding amounts shown accurately.			

12 Module: Projects

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-056	P1	Create Project	1. Projects → "New Project" 2. Enter name, client, start/end date 3. Add description 4. Save	Project created with auto-number PRJ-0001. Status: Active. Appears in projects list.			
TC-057	P2	Project Status	1. Change project status to: Planning → Active → Completed	Status badge updates each time. Color changes: Planning (gray), Active (green), Completed (blue).			
TC-058	P2	Add Tasks	1. Open a project 2. Add 3 tasks with names and due dates	Tasks appear in project detail. Can mark as complete. Progress bar updates.			
TC-059	P2	Team Members	1. Open a project 2. Add a team member to the project	Team member assigned. Shown in project detail with role.			
TC-060	P2	Project Updates	1. Add a project update/note	Update saved with timestamp. Appears in project updates feed.			
TC-061	P3	Project Filter	1. Filter by status: Active / Completed / On Hold	List filters correctly. Only matching projects shown.			
TC-062	P3	Project Budget	1. Set a budget on a project 2. Link an invoice to the project	Budget vs. actual spend tracked. Budget indicator shown (green/orange/red).			

13 Module: Change Orders

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-063	P1	Create Change Order	1. Change Orders → "New Change Order" 2. Link to a project 3. Add description and amount change 4. Save	Change order saved with Draft status. Linked to project.			
TC-064	P2	Send for Approval	1. Open Draft change order 2. Click "Send for Approval"	Status → Sent. Client notified (if email configured). Awaiting approval.			
TC-065	P2	Approve / Reject	1. Mark change order as Approved 2. Create another and mark as Rejected	Approved: green badge, project budget updated. Rejected: red badge.			
TC-066	P3	Change Order List	1. View all change orders	Table shows: number, project, description, amount, status, date. Filterable by status.			

14 Module: Scheduling

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-067	P2	Set Availability	1. Scheduling → Availability tab 2. Set Mon-Fri 9am-5pm 3. Save	Availability saved. Time slots reflect the set hours.			
TC-068	P2	Booking Links	1. Scheduling → Links tab 2. Create a booking link for "30-minute consultation"	Booking link generated. Shareable URL shown. Can copy link.			
TC-069	P2	Meeting List	1. Scheduling → Meetings tab	Shows scheduled meetings (upcoming first), with client name, time, type.			
TC-070	P2	Meeting Types	1. Scheduling → Settings tab 2. Create a meeting type with 60-minute duration	Meeting type saved. Appears in booking link options.			

15 Module: Communications

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-071	P2	Send Email	1. Communications → New 2. Select channel: Email 3. Select a contact 4. Write subject + body 5. Send	Email sent (or logged as sent if Resend not configured). Appears in communication log.			
TC-072	P2	Log a Call	1. New communication → channel: Call 2. Select contact, add notes, duration 3. Save	Call logged in communication history with timestamp.			
TC-073	P2	Add Note	1. New communication → channel: Note 2. Select contact, write note 3. Save	Note saved in communication log. Visible under contact's history.			
TC-074	P2	SMS / WhatsApp	1. Try logging SMS and WhatsApp communication types	Log saved with correct channel type. Icons distinguish SMS from WhatsApp.			
TC-075	P3	Filter by Channel	1. Filter communication log by: Email / SMS / Call / Note	List filters to show only selected channel type.			

16 Module: Team Management

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-076	P2	Invite Team Member	1. Team → "Invite Member" 2. Enter email, select role (Staff) 3. Send invite	Invitation email sent. Pending invite appears in team list with "Pending" badge.			
TC-077	P2	Accept Invite	1. Check invited email inbox 2. Click invite link 3. Register (if new user) or login	Invited user joined. Appears in team list as active. Role is Staff.			
TC-078	P2	Change Role	1. Change a team member's role from Staff to Admin	Role updated. Team member sees more permissions on next login.			
TC-079	P1	Remove Member	1. Remove a team member 2. Try to login as that member	Member removed. Their session is invalidated. They cannot access the business data.			
TC-080	P2	Role Permissions	1. Login as Staff member 2. Try to access Team settings page	Staff members cannot manage team (redirect or access denied). Owner-only actions hidden.			

17 Module: Templates

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-081	P2	Create Template	1. Templates → "New Template" 2. Select type (Quote / Invoice / Contract) 3. Add name, items, description 4. Save	Template saved. Appears in template list.			
TC-082	P2	Use Template	1. Create a new quote 2. Click "Use Template" 3. Select the saved template	Line items from template pre-filled in the quote. Can edit before saving.			
TC-083	P3	Edit Template	1. Edit a template's items 2. Save	Updated template saved. Future uses of the template use the new items.			
TC-084	P3	Delete Template	1. Delete a template	Template removed from list. Confirmation dialog shown before delete.			

18 Module: Notifications

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-085	P2	Bell Notifications	1. Perform an action (send quote) 2. Check the notification bell	Notification appears in bell dropdown. Unread count badge shown.			
TC-086	P2	Mark as Read	1. Click a notification in the dropdown	Notification marked as read. Count badge decreases. Unread dot removed.			
TC-087	P3	Notification Settings	1. Settings → Notifications 2. Toggle off "Quote Sent" notification 3. Send a quote	No notification received for quote sent (if setting honored).			

19 Module: Settings (9 Sections)

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-088	P2	Profile Settings	1. Settings → Profile 2. Change name, click Save	Name updated. Shown in sidebar and header immediately.			
TC-089	P2	Change Password	1. Settings → Security 2. Enter current password, new password, confirm 3. Save	Password changed. Old password no longer works on next login.			
TC-090	P2	Quote Prefix	1. Settings → Numbering 2. Change quote prefix to "EST-" 3. Save 4. Create a new quote	New quote uses EST-0001 (new prefix). Previous quotes unchanged.			
TC-091	P2	Tax Rate	1. Settings → Preferences 2. Set default tax rate to 8.5% 3. Create a new quote	New quote pre-fills tax at 8.5%.			
TC-092	P3	Email Settings	1. Settings → Email 2. Set a reply-to email 3. Save	Reply-to address saved. Used in sent emails.			
TC-093	P3	Currency/Region	1. Settings → Region 2. Change currency to USD 3. Save, check a quote	Currency symbol \$ shown on quotes and invoices.			
TC-094	P3	Settings Sections	1. Click through all 9 Settings tabs	All tabs load without error: Profile, Preferences, Numbering, Notifications, Email, Integrations, Region, Security, API/Webhooks.			

20 Module: Subscription & Billing

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-095	P2	Subscription Page	1. Navigate to /subscription	3 plans shown: Free Trial (\$0/15 days), Monthly (\$49/mo), Yearly (\$490/yr). Current plan highlighted.			
TC-096	P2	Upgrade to Monthly	1. Click "Upgrade" on Monthly plan 2. Complete Stripe checkout with test card	Checkout opens. Payment processed. Plan upgrades to Monthly. Stripe shows subscription.			
TC-097	P3	Trial Expiry	1. Check trial countdown on subscription page	Days remaining shown accurately. Upgrade CTA clearly visible.			
TC-098	P3	Billing History	1. After upgrading, check billing history section	Shows past payments with date, amount, status (Paid).			

21 Module: AI Assistant (Chatbot)

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-099	P2	Open Chatbot	1. Find the AI assistant icon (bottom right or sidebar) 2. Click to open	Chat panel opens. "Hello! How can I help?" greeting shown.			
TC-100	P2	Ask a Question	1. Type: "How do I create a quote?" 2. Press Enter or click Send	AI responds with a helpful answer within 5 seconds. Response is relevant.			
TC-101	P3	Multi-turn Chat	1. Ask 3 follow-up questions in the same chat	Each response is coherent and references previous context.			
TC-102	P3	Chat UI	1. Check chat bubble colors 2. Check input field, send button	User messages: right-aligned, navy/blue. AI messages: left-aligned, gray. Input and send button visible.			

22 Module: Reports

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-103	P2	Reports Page	1. Navigate to /reports	Reports page loads with charts and summary statistics.			
TC-104	P2	Date Range Filter	1. Set date range to "Last 30 days"	Charts and stats update to reflect data only in that range.			
TC-105	P3	Revenue Report	1. View revenue report with at least 2 paid invoices	Revenue total matches sum of paid invoices. Chart shows correct months.			

23 Security & Data Isolation Checks

Test ID	Prio	Feature	Steps	Expected Result	Actual Result	Status	Notes
TC-106	P1	Data Isolation	1. Register 2 separate accounts (Account A, Account B) 2. Create a quote as Account A 3. Login as Account B 4. Navigate to /quotes	Account B sees ZERO quotes from Account A. No cross-tenant data leakage.			
TC-107	P1	API Auth	1. Open browser DevTools → Network tab 2. Call /api/quotes directly (no cookie)	API returns 401 Unauthorized. No data returned.			
TC-108	P1	HTTPS	1. Check the URL bar on clearbuildusa.com	Padlock icon shown. URL starts with https://. No "Not Secure" warning.			
TC-109	P2	Session Cookie	1. DevTools → Application → Cookies 2. Find cb_session cookie	Cookie is HttpOnly (not readable by JS). SameSite is Lax or Strict. Secure flag set on HTTPS.			
TC-110	P2	XSS Test	1. In any text field (contact name, quote note), enter: <code><script>alert(1)</script></code> 2. Save and reload page	Script not executed. The text is shown literally or escaped. No alert popup.
